Choose Your Tool Trays

Storing tools in hard to reach places and in an illogical manner can disrupt the workflow of any garage or workshop. The unique Teng Tools Get Organised System uses tool trays that click together to fit perfectly into your chosen storage solution. You do not have to waste time searching for tools anymore.

Every tool has its own specific place in your toolbox. You can rest assured knowing that any tool you need is easy to find and ready for the task whenever you need it. This creates a more efficient workflow and gives you more time to do what you do best every day.

3 Click Together

Teng Tools EVA foam tool trays are the ultimate choice in tool organisation. The 3-colour EVA foam clearly alerts the user when a tool is out of place, so it can be identified immediately. Purchasing replacement tools for tools that simply cannot be found can end up costing a lot of money. Get Organised with Teng Tools to avoid these costs.

If you take pride in your work, take pride in your tools. When tools are stored in an organised manner, you see the results with the increase of efficiency and productivity. When you choose Teng Tools you immediately stand out from the crowd as an individual who is ready to succeed.

RACKING SYSTEM

WORKSHOP STORAGE CABINETS

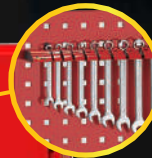

The Teng Tools Racking System has been developed to create the ultimate garage or workshop environment that increases efficiency and maximises space.

Work better, work faster, know where every tool in your garage is exactly when you need it! The Racking System can be supplied with tools creating an unrivaled workspace and storage solution for you.

With the wide range of accessories available you can find everything that you need to build the workshop of your dreams.

Combination locking system so you can rest assured the contents are safe

Back panels ideal for hanging tools and equipment keeping them within arms reach of your workspace

Double high density laminated work surface that is durable and easy to clean

All drawers and shelves are built to last! They can handle the demands of any busy workshop

Supplied with adjustable legs to keep your work surface level and steady

TOWN & COUNTY
ENGINEERING SERVICES LTD

WHY YOU SHOULD CHOOSE TENG TOOLS WORKSHOP CABINETS

- 1** In a single purchase we offer you the opportunity to get a complete storage and workspace solution complete with industrial quality tools.
- 2** Endless combinations! All tools are supplied in the unique 'Get Organised' tool trays that fit neatly into all cabinets and shelves. The vast selection of tools combined with the Racking System is now one of the widest on the market.
- 3** Teng Tools Racking System is completely modular. You can start small and build a workshop that can evolve and grow to meet the ever changing demands of any professional. Each racking module can be fully customised and can be rebuilt for alternative layouts.
- 4** Manufactured with fully welded heavy gauge steel and with all of the 'Typically Teng' features that you would expect from Teng Tools. This Racking System is resilient and ready for the toughest workshop conditions.
- 5** All of the cabinets and shelves in our Racking System are supplied in the iconic Teng Tools red colour. With this powder coat paint finish you are guaranteed to stand out from the crowd!

THE ONLY CHOICE FOR WORKSHOP ORGANISATION

Holland Collision Repair in New Zealand have used the Teng Tools Racking System to increase their workshop efficiency. Owner Cameron Holland, along with his brother, Clayton, put a lot of effort in planning their ultimate workshop setup.

Having seen many workshop environments Cameron says that the biggest cause of downtime and frustration generally is searching for tools when you need them. "Panel-beaters traditionally supply their own tools and you get a big mix and match. And they take tools home and don't bring them back, so they are not there when you need them. If we have everything on hand, it's going to speed things up," says Cameron.

He took the decision to invest in supplying all of the tools for his workshop that would sit in an organised storage solution. The Teng Tools Racking System was the obvious choice. They used a total of 17.5 meters of the modular Racking System. All tools are supplied in the Teng Tools Get Organised tool trays so you can see at a glance if a tool is missing.

Cameron comments that since installing the Teng Tools Racking System productivity has increased and they are now working more efficiently than ever before.

INCLUDES ALL OF THESE TOOLS!

SOCKET SETS

FEEL THE DIFFERENCE

A good socket set is one of the most important things to have in your tool collection. Do not try and get away with skimping to save some cash in the short term when choosing a socket set. You can guarantee that when you choose Teng Tools you will not be let down!

The most important component of any socket set is the ratchet. Whether it be the 'FRP' fibre ratchet handle with steel reinforcement or the 72 teeth range that gives a working arc of just 5° you really can feel the difference when you hold a Teng Tools ratchet. Service kits are available and are easy to fit so once maintained properly a Teng Tools ratchet can last a lifetime.

It wouldn't be a socket set without some sockets! All Teng Tools sockets are developed with the non-slip "Hip Grip" system. This means that the socket grips on the flat surfaces of the nut rather than on the corner preventing damage and slipping. Deep etching makes it easy to identify that 10mm socket at a glance.

With the quality of ratchets and sockets available you do not want to store them in any old box. You need to protect them in a fully organised Teng Tools carry case. Made from fully recyclable plastic material with hard-wearing metal pin hinges these cases are built to last.

The larger cases are supplied with a secure click locking mechanism and a divider that keeps the tools in place when you are on the move. Rubber feet on the base prevent the case from sliding while you are working.

DRIVER BITS

Teng Tools bits are designed for professional applications in the automotive and industrial industries. They are built to withstand a high torque capacity and have a long service life.

HIP-GRIP SOCKETS

The socket grips on the flat surfaces of the nut rather than on the corner. This helps to prevent damage to nuts and bolts and makes it possible to grip nuts and bolts which already have damaged corners.

TOWN & COUNTY

SCREWDRIVERS & BITS

CHOOSE TOOLS THAT WORK HARDER FOR YOU

Unlike other brands the Teng Tools screwdriver blade has steel alloy wings that the plastic handle is moulded around. This allows for greater torque to be put on the screwdriver, ensures the blade is dead straight and stops the blade from moving in the handle.

INSULATED SCREWDRIVER & PLIER SET

18 Pieces

- 1000V screwdrivers
- 1000V pliers
- Wire strippers
- EN 60900 / IEC 60900 standard

AIR TOOLS

DEVELOPED TO EXCEED THE DEMANDS OF A PROFESSIONAL AUTO WORKSHOP

Air is a powerful and versatile resource that can help you get the job done quickly! If you need to cut through steel or machine-tighten a bolt, you will need a certain amount of torque. Choosing a tool for its convenience or cost really won't do any good if it isn't strong enough to get the job done. This range of air tools pack a real punch and have been developed to exceed the demands of a professional auto workshop.

They can operate in areas where other power sources are not available, and they can perform a variety of tasks that electric tools cannot. The tools can withstand various elements, such as dust, heat and water, better than electrical tools. With a simple manufacturing process, their apparatus is less prone to breaking down and they are more lightweight than their electric counterparts.

The range has been developed with 'Typically Teng' features including rubber grips, composite material and reduced vibration to make the tools more user friendly.

COMPOSITE IMPACT WRENCH

- Forward/reverse button for one handed operation
- High torque action
- Extra lightweight composite sound absorbent housing
- Twin hammer mechanism for increased torque
- Handle design insulates against cold air and vibration

163/244/450 Nm

IMPACT DRIVERS

STUBBORN SCREWS + BOLTS DON'T STAND A CHANCE!

As a mechanic there is nothing more frustrating than wasting time and effort trying to loosen a stuck nut or bolt. Hand impact drivers are simple tools that work amazingly well for this task. Compared to a power impact tool there is far greater control with these models, they give greater access and they are so easy to use. If you can hold the tool and swing a hammer, then you can use this affordable impact tool!

After inserting the correct impact bit into the impact driver engage the stubborn screw or bolt. Apply downward pressure, while at the same time attempting to turn the impact driver in the direction you want the screw or nut to turn. Now the fun part! Whack the top of the impact driver with a hammer until the screw or nut is loosened enough to use a faster tool, such as a socket and a ratchet.

MEASURING TOOLS

WHEN ACCURACY IS KEY Make the professional choice

Measurement tools are often an afterthought when compiling tools for a workshop, but they shouldn't be. A minute error in measurement is all it takes to ruin an entire project. Invest in quality measurement and layout tools, which will last longer and remain accurate for years to come.

The Teng Tools range of Measuring Tools have been developed by focusing on users requirements across the automotive & industrial sectors. High accuracy, low uncertainty and validated measurement methods come as standard!
